Portfolio: **[portfolio-shuaibshaban.vercel.app](https://portfolio-shuaibshaban.vercel.app)**

Experienced Full-Stack Software Engineer proficient in crafting robust web applications utilizing technologies like React.js, Tailwind CSS, Ruby on Rails, Node.js Express, and Java.

Demonstrated ability to collaborate effectively in team settings, facilitating resource access and support. Dedicated to ongoing learning, with a history of tackling intricate problems and guiding students in frontend development. Eager to apply expertise at Everest Tech Hub, embracing fresh opportunities in the ever changing realm of software development.

### Education.

May 2023 - present : Diploma in Computer Science - The Co-operative University Of Kenya.

November 2022 - May 2023 : Certificate in Software Engineering Moringa School.

### Technical skills.

- Programming Languages: JavaScript, Java, Node.js, Ruby on Rails.
- Web frameworks: React.js.
- Database: PostgreSQL, MongoDB, SQLITE3.
- Version Control: Git
- Web Technologies: HTML, CSS, TailwindCSS, Bootstrap.

### Professional Experience.

Technical Mentor - Frontend Development

Everest Tech Hub Academy

June 2023 - Present

- - Collaborated with colleagues and administrators to facilitate access to resources and support.
- Regularly assessed progress and provided feedback to promote continued development.
- Empowered students through counseling and skill-building exercises.
- Mentored, students how to use Git and run Git commands in their CLI, as well as how to use GitHub to showcase their projects to potential recruiters.
- Actively participated in code reviews, identifying areas for optimization and implementing best practices for code quality and maintainability.
- Mentored students in frontend development, teaching them the foundational basics of frontend development: HTML, CSS, JavaScript, React, Tailwind CSS , Bootstrap CSS.
- - Taught students how to deploy their web applications and write clear and concise READMEs.

- Maintained Everest's website and introduced new frontend features to enhance user experience.
- Assisted students who faced blockers while working on projects and provided guidance on writing clean and maintainable code.

## **Projects.**

### **Fashion Store**

- Fashion Store is a MERN stack e-commerce, developed by a group of developers that has 4 people.
- The subdivision of tasks was two people had to work on frontend and the other two had to work on backend. Frontend was developed using React.js, CSS, and backend was developed using Node express and MongoDB.
- This is a site where users can shop products online. I played a crucial role in frontend development and responsive design in a team environment, demonstrating my problem-solving abilities.

### **Cocktails Parlour**

- Cocktails Parlour, an individual project.
- I used the CocktailsDB API to provide drink recipes and ingredients.
- Users can search for drinks and view the method of preparation together with the ingredients required. Users also get to know whether the drinks they are interested in are either alcoholic or non-alcoholic.

(phase-1-final-project.vercel.app)

### **Book-Bros**

- A full-stack book review website created with Ruby on Rails, SQLITE3, React.js, and CSS.
- Users can perform CRUD operations and write reviews on books they have read.

(ubiquitous-manatee-cc6e00.netlify.app/)

### **Petify**

Pet Adoption Management System:

- Developed a comprehensive web application that facilitated the management of pet profiles, adoption applications, and communication between pet adopters and shelters.

Petify Website Redesign:

- Led a team of designers and developers to redesign the Petify website, focusing on improving user engagement and adoption conversion rates.
- Implemented a responsive design approach and enhanced the search functionality to help users find their ideal pets more effectively.
